

REMARKS

This Amendment is submitted supplementary to the previous Amendment in connection with the interview with the Examiner.

During the interview the Examiner indicated that in his opinion the wiper strip 20 provided with the carrying rails 12 is held by compression produced in the longitudinal web 36. As suggested, claim 1 has been amended correspondingly. It is therefore believed that the present application should be considered as being in allowable condition, and such action is earnestly solicited.

Reconsideration and allowance of the present application is most respectfully requested.

Should the Examiner require or consider it advisable that the specification, claims and/or drawings be further amended or corrected in formal aspects in order to place this case in condition for final allowance, then it is respectfully requested that such amendments or corrections be carried out by Examiner's Amendment, and the case be passed to issue. Alternatively, should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, he is invited to telephone the undersigned at (631-549-4700).

Respectfully submitted,

Michael J. Striker
Attorney for Applicants
